Kaivac PDUNITK: Portable Dispensing Unit Kit

Description

The Portable Dispensing Unit (PDU) is a low cost, easy to use chemical proportioning system that provides accurate dilution control anywhere there's a faucet with standard garden hose threading.

Simply attach the Portable Dispensing Unit to a Kaivac chemical bottle and connect it to any water source with a standard garden hose. Then, turn on the water and place the PDU fill hose in spray bottles, mop buckets, Kaivac innovative floor care systems, autoscrubbers and more. No more manual mixing, measuring or unsafe chemical exposure. And, with a two-gallon (eight liters) per minute flow rate, it makes short work of dispensing precise dilutions of cleaning chemicals for any application.
