Sanitizing, Cleaning and deoderization chemicals.

Water Claw Wand to remove water and odors from under the carpet and padding/cushion.

Wall and floor perforation tool

Moisture meters to confirm the walls are dry before you remove equipment.

Pick up and delivery (in some cases)

Caution: It is important to not overload the electric power circuits in the building that you are placing the equipment. Just because it plugs into an outlet does not mean it is OK to that outlet. It is the responsibility of the user to confirm that the power can support the equipment.

Questions:

A. How come I have to supply my Social Security Number?

Answer: This is to affect your credit when you do not bring the equipment back. This is no different than when you go to the doctor's office and they ask for your social security number. The only reason they need it is if you do not pay your bill promptly. The only reason the doctor's office needs your SS number is to affect your credit. This is a requirement. The only way to avoid providing this information is provide a large enough cash deposit that will purchase the equipment.

B. Are you open on Sunday?

"No." If you rent on Saturday we do let you keep the equipment an extra day for free, if you do not use the equipment, but you will be required to bring the equipment back on Monday morning. If you use the equipment on Sunday you will have to pay for the rental for Sunday. The dehumidifier has an hour meter on it.

C. Can I reserve a machine for a specific day?

"Yes." Only if you prepay for it. We will have to take the required information over the phone and charge you in advance for the rental.

D. What if I prepay for a rental and cannot show up to pick up the machine?

All sales are final. No credit is placed back on your credit card, but we can carry over the funds to use on a different day (like purchasing an air line ticket.)

E. What if the machine does not work? Will you bring me a replacement? Can I get my money back?

You will be required to bring the machine back to us. We will not bring you a replacement. Over 90% of the times a customer states they cannot use the machine, the machine is tested at our location and we cannot find anything wrong with it. Please make sure before you leave our location, you know how to use the machine! When you bring back the machine, it will be tested, if there is nothing wrong you can finish out the days rental. If there is really something wrong with the machine, you can have a substitute machine or have credit to use on a different day. You will not get your money back.

F. Does the machine come with instructions on How to dry building or do odor control work ...?

"No." Please ask your service rep at SteamBrite for help with any specialty issues.

G. How long does it take to dry a building?

Carpet dries in one day, foundation will usually take two days. Walls and cabinets will take a full 3-7 days. The previous statement is based on the correct air movement

and temperature maintained in the building.

H. What will happen if I only rent for one or two days?

You will grow mold and mildew inside your walls. Please confirm the moisture content of the walls is below 10% before you remove the air mover from the building!

I. Will Steam Brite come out and clean or do a job for me?

Yes. You can call our office for a referral to a list of some of the companies that have attended our classes and have offered many years of service to the community.

J. Can I pick up a machine on Friday and bring it back on Monday?

Yes, but you will be charged for the number of days you use the dehumidifier(s).

K. I only got water on the floor and not the walls, do I need to rent for three full days?

99.99% of the time when I have customers tell me that their walls are not wet, they are wet. The walls are not a little wet but very wet. It is not uncommon if you have a half an inch of water in your building your walls can be wet up to 3 feet high. The water will wick straight up the walls. If the water touched the water on the floor the wall is wet even if you cannot see it or feel it with your hand.

L. What is the recommended temperature to set the AC/ Heating on?

68 degree F with the blower motor to the ON position.
