

Model Number: 12-CH-QUAD

Rotovac 360i Four Slot Head 12-CH-QUAD

Manufacturer: Rotovac

Rotovac 360i Four Slot Replacement Head (4)

The Rotovac 360i has a new optional carpet cleaning head specially designed for high powered portable extractors or truck mounted machines. The NEW Quad Head features FOUR stainless steel Swoop Glide vacuum ports and 4 spray jets producing higher flow with more agitation than the standard head. The Quad Head cleans both commercial and residential carpets up to 25% faster.

The Swoop Heads capture and eliminate overspray while producing better water extraction, agitation and overall cleaning results. A "ski ramp" built into the leading edge allows the Swoop Heads to ski up and over obstacles rather than ramming into them, thus preventing damage. The outer end of the vacuum slot curves into the direction of the rotation to improve recovery to the point where no second dry pass is usually needed.

With a quick change out of the cleaning head the Quad Head can be easily mounted on any Rotovac 360i. Constructed from solid cast 304 stainless steel the new Swoop Heads come with a lifetime warranty against wear.

Designed for use with more robust vacuum systems; example a Truck Mounted Carpet Cleaning Machine, machines that uses Vacuum Boosters, portables that are auto fill and dump that have at least 6 or 8 stages of vacuum (or more)
