### • CARPET

- Compound dry cleaning
- Encapsulation dry cleaning
- Pile lifting
- Dry soil removal

### • HARD SURFACES

- Floor washing
- Scrubbing/drying
- Tile and grout cleaning

### • RUGS

- Splash-water proof construction is IP 54 certified allowing you to use the Brush Pro in several inches of water for scrubbing submersed rugs

- Super quiet operation and nearly instantaneous drying allows you to clean during business hours; opening up a world of new clients including casinos, airports, hotels, hospitals and more where hot water extraction is just not feasible.

## SUPERIOR CLEANING

Brush Pro, prespray and dry compound are Carpet and Rug Cleaning Institute (CRI) certified for deep cleaning.

Heavy-duty motor spins brushes at an incredible 380 RPM to quickly and thoroughly clean all sides of the carpet fiber.

- Included Renovators allow you to collect soil that normal vacuuming is unable to remove. This makes for a great demo. Have your customers vacuum right before you

use the Brush Pro for dry soil removal and they'll be amazed at how much additional soil you remove.

Cylindrical brush agitation carries the soil from the bottom of the pile to the top so it can be encapsulated and removed later through vacuuming. Pads drive the soil deeper into the pile and leave "blooms" that have to be removed later.

- Pads are not effective at cleaning uneven surfaces like grout lines, while the Brush Pro excels at removing soil on difficult-to-clean surfaces.

## SIMPLICITY

The Brush Pro is a machine that can be used by anyone. Simply pull back the handle to start and begin cleaning carpets at a much faster rate than standard hot water extraction.

Lightweight construction and small footprint allows the technician to easily store the Brush Pro in a janitor's closet, in a van or other locations where space is at a premium. It also makes cleaning around furniture and other obstacles incredibly easy.

HCR Dry Cleaning Powder Carpet Cleaner Control

A. Are you open on Sunday?

"No." If you rent on Saturday we do let you keep the equipment an extra day for free, if you do not use the equipment, but you will be required to bring the equipment back on Monday morning.

B. How do I choose between professional service and rental?

You can even do both. We can come out, set up for you, train you and then let you finish out the job. We will charge for the service call \$35 + labor @ \$72 per hour + rental + materials. You can have us do as much or little as you need or want. When the job is finished, you can either bring back the equipment to Steam Brite or we can charge another service call and pick it up.

C. How do I know if I need the liquid only service or the service that uses the powder too?

I always recommend that you be prepared for both. We can charge the \$0.25 sq ft for the entire job (professional service) and then surcharge the extra \$0.25 sq ft for the absorbent powder service in just those areas. Everybody has areas that look dirty. The liquid only cleaner is a great way to maintain a carpet on a regular basis but the absorbent powder will improve results for a more aggressive clean.

D. Does the machine remove 100% off all the power that is placed in the carpet.

No. But with regular vacuuming you will notice the carpet does stay clean a long time and the post vacuuming with your own vacuum cleaner will continue to improve results.

E. Are any of the chemical hazardous?

No. The CTI Brush N Bonnet cleaner is part of their EnvireX Green Line as environmentally friendly product.

The Harvard Chemical Adsorbent powder also 100% biodegradable with a neutral pH made from corn cobs and orange oil, so it deodorizes at the same time.

Why Use SteamBrite ?
