Robotic Designs Anatroller ARI10 Robotic Air Duct Cleaner

We include a tablet PC and a GOPRO camera and made the carrying and control case more innovative.

The ANATROLLER<sup>®</sup> ARI-10 is a highly manoeuvrable miniature mobile robot, designed to be easily deployed in seconds and work in both vertical and horizontal ducts. This robot is specialized for professional inspection, brushing, coating and disinfecting operations in metallic ductwork. A built-in high resolution camera and removable 360° rotating full HD cameras provide the most effective solution for professional duct inspection.

The ANATROLLER ARI-10's unique movement system allows it to clean and inspect metallic ducts vertically. It is equipped with a removable module on top of its base, which contains extra lighting and the customizable tool holder.

This robot represents the most significant advance to duct cleaning equipment commercially available, thanks to its small size, stain-less steel cable, two wheel drive train and HD cameras, enabling HVAC contractors to leave every duct spotless, distinguishing you from your competition by ensuring satisfied clients every time the ANATROLLER ARI-10 is used.
