

Model Number: 20131111

Clean Storm Truckmount Vacuum Relief Electronic Solenoid Adjustable Valve 20131111

Manufacturer: Clean Storm

Clean Storm Truckmount Vacuum Relief Solenoid Adjustable Valve  
Solenoid Operated Value Control (SOVC)

Mounts through 1/2" Fip connection.

12 volt

Electronically set vacuum relief to 14 HG.

Can be mounted between truckmount vacuum blower and waste tank or direct on waste tank.

Industries first completely adjustable between 8" to 16" HG of lift system.

Zero vacuum leakage until the preset amount of vacuum is reached then the solenoid opens all the way.

Use one for 33 and 36 blowers but on larger 45, 47, TI406, TI408, and TI410 blowers two units need to be installed.

Can also be combined with your existing system where you use this as your primary vacuum relief system and the original is adjusted as a back up truckmount vacuum relief system.

When added to a truck mount, SOVC will:

1. Save time and energy: no more dry passes which means clean Twice as Fast!
  2. End customer's problems with wicking
  3. True dual wanding
  4. Increase cleaning income: more jobs with the same time and effort.
  5. Short dry time
  6. Increase referrals from greatly satisfied customers
- 90 Day parts warranty.  
special order so allow and extra 2 week build time.
