

Model Number: 60.302

Mosmatic 60.302, LUW Car Wash Ceiling Mounted Air Boom, 5ft 3inches 1.5inch diameter, Bottom Connection

Manufacturer: Mosmatic Pressure Washing Equip

60.302 Airsystem-wall-boom 5' stainless-steel (side inlet) LU-1 1/2"W in+out= D 1 1/2"

Unlimited freedom

The Mosmatic air-system boom offers optimal freedom of movement when vacuuming and drying vehicles thanks to the smooth 360-degree or 180-degree rotation of the air boom. There are no hoses lying around on the ground, which prevents annoying dirt accumulation and premature wear and tear of hoses.

Versatile combinations

Regardless of whether it is outside or inside the self-service wash bay, various types of the air-system booms allow a wide array of installation choices. When combined with other Mosmatic products, an optimal use of space and design is possible.

Three different connection options

Can be connected above, to the side or below. Mosmatic adapts to your requirements.

Self-lubricated bearings

The connecting component between the axle and the air tube is the rotating and pivotal point. Because this area experiences the most intense pressure, top-quality, self-lubricating bearings are used, which also reduces the amount of maintenance needed.

Polished stainless steel (inox)

A strong and visually elegant design are a priority for all Mosmatic products. We use polished stainless steel (INOX) for all our products protecting them from rust and extreme weather conditions.

Rotates 360 degrees or 180 degrees

To provide optimal freedom of movement, the air-system boom is offered in a 180-degree rotating version for wall installation or in a 360-degree rotating version for ceiling installation.

Your choice of diameter

Two different tube diameter options allow for complete flexibility. The air-system boom

Equipment: Carpet Cleaning Machines > Vacuum Cleaners > HEPA Concrete Dust Slurry Hazmat Vacuums >

is available in 40- or 50-mm diameters.

Ready to install

All Mosmatic booms are delivered pre-assembled. You can install the booms yourself by following the enclosed instructions. The boom is ready for immediate use after being connected to the media supply.
