

Model Number: PR600psi

Little Giant PR600psi Pressure Relief Valve X 1/2 Mip (Low Pressure Models) LGPRV #PR

Manufacturer: Little Giant

Little giant pressure relief valve 600 psi for Low pressure models only PR600 LGPRV

1/2" Mip X 1/2 Barbed

- A safety relief valve is a valve mechanism for the automatic release of a substance from a boiler, pressure vessel, or other system when the pressure exceeds preset limits.
- Excess pressure is vented out through discharge fitting, preventing damage to pump. Designed for self-cleaning of circular area chamber and piston head. Water continues to circulate, eliminating build up of mineral and waste products.
- Adjustable set screw allows setting relief valve for discharge at your specific pressure.
- Stainless steel spring.
- All safety relief valves are tested but are not preset.
- Compare to current or past OEM associations:
