Definitions:

Live reel means the vacuum hose stays hooked to the vacuum through the hub of the reel full time through a swivel.

Storage reel means you have to remove the hose off the reel for use. The reel is just used to wind up the hose and store it.

Electric means you hook to your 12 volt battery and with a push button momentary switch you wind up or unwind the hose.

Live Electric is both live and electric on the same reel

Storage Electric means that it is both electric and storage combined.
