

Model Number: SBMFlowK

Clean Storm High Flow Extraction Conversion Kit [SBMFlowK]

Manufacturer: Clean Storm

Turn your regular carpet cleaning machine into a High Flow Extractor with our High Flow Extraction Conversion Kit. This simple kit is easy to use and is a great backup to any portable or truckmount extraction machine in case of pump malfunction. Kit includes a faucet adapter that can be used on the two most popular faucet threads count, adapter hose with female QD, two brass TeeJet 11006-08. This adapter is attached by unscrewing the faucet aerator and screwing the adapter that changes faucet threads to standard garden hose threads. Attach the two foot hose to the faucet adapter and attach your pressure hose to the brass female quick disconnect. Change the spray jets that are on your carpet cleaning wand to the two brass TeeJet 11006-08. Turn on the hot water at the sink. This will provide nonstop production and flush the carpet. This system works on cleaning carpet very well because the jets are up to 6 times larger than normal. Normal city water pressure is at 65 psi which is the pressure you are cleaning at with a 100 to 150 psi pump.
