

Model Number: 40-1000

Sandia 40-1000, Universal 4 Gallon Shampoo Buffer Tank, 390AC

Manufacturer: Sandia Plastic

Sandia 40-1000 Universal 4 Gallon Shampoo Buffer Tank

Description

The Sandia 4-gallon solution tank is constructed of heavy-duty polyethylene, making it durable for any environment. The unit can withstand temperatures up to 200 degrees without becoming brittle, cracking or leaking. This high quality 4 Gallon Solution/Shampoo Tank provides easy universal attachment to any floor buffer by large U-bolts (included). A large opening allows for spill-free filling. Carrying a full 4 gallons of carpet shampoo or floor cleaner, the liquid release can then be controlled by the floor buffer operator by a top mounted lever. By lifting the lever, the liquid in the tank is released from the bottom of the tank (gravity feed), down through a hose to a nozzle on the top of the floor buffer, on down to the brush, agitation area. Includes super drain valve. While cleaning, the amount of shampoo or floor cleaner is easily controlled, and the cleaner goes where it is most needed. This system makes for faster work than either mop application or stand alone tank sprayer applications. 1 Year warranty in parts.

Parts List

Features

- Exclusive super drain valve
- Quick change valve seal, No tools needed
- Oversize handle and vinyl sleeve
- 4 Gallon polyethylene tank
- Muffler clamps eliminate slippage on shaft
- Large opening for easy filling
- Aircraft nylock nuts
- Adjustable valve tension
- Fits all floor machines
