

Model Number: 20191129

Clean Storm 20191129, Hose Mount Vacuum Power Booster, 6.6 Vacuum for Carpet And Tile Cleaning, (2 Week Build Time)

Manufacturer: Clean Storm

#### Clean Storm 20191129 Hose Mount Carpet Cleaners Vacuum Power Booster Description

Clean Storm Hose Mount Vacuum Power Booster with 6.6 vacuum motor shortens dry times while allowing you to run longer hose runs and wider cleaning tools. Keep you machine more stationary and just run longer hoses instead of having you machine follow you around the job site. Keep you machine on the first floor and just run more hoses to the second floor. You can upgrade to 14 and 15 inch wide tools for up to 20 - 33% faster cleaning over traditional 11 and 12 inch wide tools. This unique system provides up to 139 CFM's of Air-Flow and up to 132" of water-lift to your existing extractor for unmatched performance on long hose runs, giving you increased suction, leaving carpets dryer. This will allow the portable or truck mount operators to go the distance when their current machine vacuum becomes tired and worn out, or who simply desires greater efficiency.

#### Requirements and Instructions

- Designed for dual 3 stage and dual 6.6 vacuum motor systems or larger. DO NOT USE this booster with single vacuum motor or dual 2 stage vacuum portables. Parent machine must have a stronger vacuum rating than the booster or the booster can blow water mist out the exhaust port!

- Turn on booster before parent machine to prevent the vacuum motor spinning backwards.

- For best performance, please use as much 2" ID vacuum hose between your parent machine and the booster as well as on the way to your cleaning wand. 2" vacuum hose offers 100% more air flow than 1.5" ID vacuum hose.

- Please use on its own 15 amp breaker.

#### Specification

Vacuum Motor

Ametek Lamb 122475-00 Two Stage 6.6

CFM

139

Water Lift

132"

Power Cord

Single 25' 12/3 extension cord

Amp Draw (110-120V 60Hz)

15 amps

#### Additional Information

Please install a Hose Mount Lint removal system between booster and cleaning tool. This will assist in keeping the lint filter located under this vacuum motor cleaner longer.

The two bolts on the side between the upper box and middle box and be removed for servicing these filters.

Please note if your machine is already producing 132" water lift, it is not going to increase the gauge lift rating, rather it is changing the total CFM that is excavated from the carpet which in turn changes the inches of water lift in the wand, thereby lowering your dry time.

It certainly is not uncommon that whenever a great product comes along in the market place, that it quickly becomes cloned and copied by others who want to ride on the coat tails of success of the company and the inventor. This is an in line booster that is installed between two sections of vacuum hose. This unit can be used with any brand extractor or truckmount.  
Has 2" vacuum ports on it but can be used with 1-1/2" vacuum hose by pushing the 1

1/2" cuff inside the 2" fitting; or, purchase two AH46 1 1/2"-to-2" expansion cuff. Developed in the mid- 70's and patented in 1980, it became just another innovative product from the inventor himself, Ed Valentine. And since this time, it has been constantly up-graded and refined with high technology and component system design. It features an adjustable dolly handle and easy to move wheel system for the operator to avoid heavy lifting during transportation. Also available is an optional exhaust muffler that helps to lower sound decibel levels when operating indoors. This system provides a much needed 100CFM's of Air-Flow that will allow most portable/TM operators to go the distance when their current machine vacuum becomes tired and worn out.

Unique 2-in-1 Combination!:

This unique system provides up to 100 CFM's of Air-Flow and/or up to 137" water-lift , which ever the Operator prefers based on a specific job or requirement. Now, You select what you need! We use a 2 stage high-performance 6.6 vac motor; rated @ 137" lift x 101 cfm.

This will allow the portable/TM operators to go the distance when their current machine vacuum becomes tired and worn out, or who simply desires greater efficiency.

Seriously consider purchasing from the originator, who developed the product and has done all the field testing (38 years), instead of the duplicators who are constantly chasing playing catch up.

You just have to have one because once you experience the performance, you will never operate without it!

#### POWER BOOSTER FEATURES:

1. Vacuum Motor: High-Performance: up to 100cfm of air-flow
2. Tank: 8 Gallon air chamber w/ View-Thru design
3. Wheels: 2, 10" & 2, 3" Swivel Locking
4. Specs: 24" H x 22" L x 13" W / approx wt= 24lbs.

The All New "Second Generation!"

It certainly is not uncommon that whenever a great product comes along in the market place, that it quickly becomes copied by others who want to ride on the coat tails of success of the company and the inventor.

Developed in 1972, perfected and patented in 1980, it became just another

innovative product from the inventor himself, Ed Valentine. And since this time, it has been constantly up-graded and refined with higher technology and component system design. It features an adjustable dolly handle and easy to move wheel system for the operator to avoid heavy lifting during transportation.

The first system that allows the Operator a choice! And, now even more powerful than ever!

Unique 2-in-1 Combination!:

This unique system provides up to 100 CFM's of Air-Flow and/or up to 137" water-lift, whichever the Operator prefers based on a specific job or requirement. Now, You select what you need!

This will allow the portable/TM operators to go the distance when their current machine vacuum becomes tired and worn out, or who simply desires greater efficiency.

Seriously consider purchasing from the inventor who developed the product and has done all the field testing & up-grades (38 years), instead of other sales people who try their best to convince you that their copy will do the same thing. You just have to have one because once you experience the performance, you will never operate without it

#### POWER BOOSTER FEATURES:

- Value priced at: \$995.00
- Vacuum System: Select up to 100 cfm of air-flow ; or engage up to 137" of water-lift at a snap!
- Tank: 8 Gallon air chamber w/ View-Thru design; 2" inlet/outlets. (1 1/2" cuffs can also be adapted)
- Wheels: 2-10" Rear wheels & 2- 3" Swivel
- Specs: 24"H x 22" L x 13" W/ approx wt= 24lbs
- Easily rolls out like a dolly on wheels.
