Same Pump but with more durable valve assemblies and new longer lasting motor.

EFFICIENCY

The plunger type design of the 114 is the most
efficient way possible to pressurize water.
PUMPTEC® efficiency produces up to 20%
more pressure or flow for a given power input

compared to some competitors's pumps.
MAINTENANCE & SIMPLICITY
Factory lubricated for maintenance free
performance. The only tool needed to completely
disassemble the pump to its basic components
is a simple hex wrench.
DURABILITY
Durability results from exclusive use of premium
materials. All metallic wetted parts (except body)
are stainless steel or chemically resistant plastic.
The plastic pump body is nearly indestructible
compared to pumps made of castings. Precision
molded plastic body offers chemical compatibility
with a wide variety of chemicals.
VERSATILITY
Flow and pressure can be optimized to exactly
match power input to nozzle size by customer
selection of the precise eccentric offset.
