Same Pump but with more durable valve assemblies and new longer lasting motor.

## EFFICIENCY

The plunger type design of the 114 is the most  
efficient way possible to pressurize water.  
PUMPTEC® efficiency produces up to 20%  
more pressure or flow for a given power input

compared to some competitors's pumps.  
MAINTENANCE & SIMPLICITY  
Factory lubricated for maintenance free  
performance. The only tool needed to completely  
disassemble the pump to its basic components  
is a simple hex wrench.  
DURABILITY  
Durability results from exclusive use of premium  
materials. All metallic wetted parts (except body)  
are stainless steel or chemically resistant plastic.  
The plastic pump body is nearly indestructible  
compared to pumps made of castings. Precision  
molded plastic body offers chemical compatibility  
with a wide variety of chemicals.  
VERSATILITY  
Flow and pressure can be optimized to exactly  
match power input to nozzle size by customer  
selection of the precise eccentric offset.
