Moisture Meters

Meters accurately display wood moisture to assess the extent of hidden condensation.

Uses: To check surfaces before painting, wallpapering, or laying floors or tile. Trace roof leaks and water seepage. Help select dry lumber.

(D) Digital

Displays moisture from 9-30% with 0.1% resolution and 4% accuracy.

Super large 1.4-in. (36mm) LCD also displays recalled min./max. readings.

Memory contains 9 material groups with calibration data for approximately 150 different species of wood. Built-in self-calibration with manual temperature compensation. RS-232 serial interface. Contact probes, positioned at the end of a cable, can be easily extended into locations that are difficult to reach. Includes 2-pin moisture probe, 3.9-ft. cable, 10 spare pins, protective holster, and 9V battery.
