

Model Number: 60065

Pumpteck 60065, 207V Pump Head Only (replaces 204V 205V 60029 60031 60035 60062 60065 8.630-282.0 PT065 86318990) GTIN NA

Manufacturer: Pumpteck

Pumpteck 207V Pump Head 3/8 Fip Ports Fits US Products 60065

Replaces 60029, 60031, 60035, and 60062 (brass bushings might be needed - see below)

207V Pump Head Only

Ships in either Blue, Gold, or Black color; but the customer does not get to pick.

All 4 ports on this pump head are 3/8" female pipe thread and face back towards the motor.

Head is 8-7/8" wide (sometimes factory fills with 6 port (2 facing front) and supplies dual countersunk plugs to cap off un-used ports.)

Replacement for Ninja deluxe, Windsor CMPS2, and US Products machines using the 60029 head only

Please note the 60029 head uses 1/4" Fip water port connections and the replacement head 60065 uses 3/8" Fip Water port connections. Please purchase four of the brass bushing below to reduce the threads to 1/4" on your new pump head to screw in you 1/4" hoses.

If your original pump has 1/4 Fip Ports, like US Products 60065 or 60029 (below bushings might be needed)

Optional

3/8" Mip X 1/4" Fip Brass Bushing Adapter AKA 28104L A00168

Note if your hose connection are 1/4" pipe (about 1/2" across) you will need these bushing to make the water connection on this new pump smaller.

Replaces 204-pump-h2041.

Replaces the 205V pump

Replaces the 204V pump

In the past different part number represented different colors as they used to ship in blue, black, and gold.

Now they only ship in the gold color.

US Products, Nilfisk, Hydramaster, and Advance private labeled many of these with 1/4" Mip pump head water connections so you can still use this head to to fix your machine, you just have to add the optional brass bushing above.

Optional

Convert your 500 psi carpet cleaning machine into a tile cleaning machine.
Clean Storm Rhino Grout Master Cleaning Tile Cleaning Tool 300psi - 1200
psi Edging Wand 20190919

Optional, rebuild kits

Pumptec 10022 Kit B 500 psi Valves and O-Rings kit for 205V and 207V series only 512-560

Pumptec 10003 Kit A 500 psi Plunger and Seals Kit Repairs 205V and 207V Pump Heads 512-555 AKA 10055

Sometimes the factory fills 4 port pump head with a 6 port pump head and supplies 2 units of 3/8 Mip Countersunk Hex Plug Brass 28095 to cover up the holes you no longer need.

Question and Answers:

Question: I need a 500 psi pump head, is this the correct head?

Answer: This pump head is rated for up to 800 psi but commonly bolted to or mounted on a motor that has a max pressure of 500 psi installed on the inside of a carpet cleaning machine. The electric motor and pressure adjustment regulator establish the maximum use pressure and standby pressure the combined assembly can achieve. Pumptec (the factory) does not make different pressure version of this pump head. The only variable is the number of water connections on the head. We sell these heads with 4 or 6 or 8 water connections. This part number is for 4 water connection on the back side.
