The new technology built into this pump senses the water flow and adjusts the motor speed to give you an even flow and pressure without cycling. Delivers up to 4.5 gallons of water per minute at up to 30 psi.

- 30 PSI Demand flow
- 4.5 GPM
- 12 VDC
- 10.0 AMP motor
- VSD sensor
- Variable speed control
- Santoprene/EPDM
- Chemical resistant diaphragm pump
- Controls pressure by changing speed
- Eliminates need for accumulator tank

R4400 Series DC Quad Pump VSD Module

The R4400 DC VSD provides pulse free constant pressure operation on any DC voltage from 10-29 volts. Operation from no flow to maximum flow is system controlled, eliminating unwanted pump cycling and the need for an accumulator tank. The system provides reduced amp draw and quiet operation when less than maximum flow is required. Standard features include soft start to reduce splash, thermal overload, over-current and reverse polarity protection.
