

Model Number: TM-240

Heat Seal Equipment TM-240 Compact Truck Mount (diesel) w/ Kubota engine

Manufacturer: Heat Seal Equipment

Heat Seal is proud to announce the next generation of Truck Mounted Vacs. Mounted across the front of the cargo area, the duct cleaner occupies a total length of 7 feet leaving approximately 7 feet of storage area. Owners have reported excellent truck handling due to ideal weight distribution.

Features:

Suction: Has been used with 450' hose. Dynamic suction created by our 39" Aluminum and Steel high vacuum fan made by Heat Seal.

Compressor: Champion Compressor, pressure set at 240P.S.I.

Hose: Hooks up through back of truck.

Bags: Seamless, anti-static washable polyester bags which rarely need cleaning.

Installed with a chain hanging inside for gentle cleaning while travelling between jobs.

Life expectancy - 20 years.

Side Door:

Provides easy access to both engine and compressor for ease of operation and maintenance.

Clutch: Industrial, centrifugal design. With clutch disengaged, engine starts more easily and can be warmed up before putting under load. As engine speed is increased, clutch automatically engages, when clutch returns to idle, it automatically disengages.

Engine Details:

Kubota 56HP 4 cylinder turbo charged.

2 year limited warranty

Dimensions:

Truck box size requirements: Inside dimensional width 88"

Total machine length 82"

Weight: approx 1800 lbs.

- Entire machine takes up only 7 feet, leaving lots of storage space!
- Excellent accessibility makes routine maintenance easy!
