

Model Number: 20131106

Breaker Buster 20131106, Breaker Separate Circuit Indicator, Phase Finder Locator, in Water Resistant Box All Orders final.

Manufacturer: Clean Storm

Also know as a Breaker Buster, Breaker Buddy, Circuit Locator, Phase Finder, and Separate Circuit Indicator.

Phase and breaker finder in a water resistant box.

Plug the Breaker Buster in to two separate outlets and if the green light comes on you are on separate circuits!

Usually one end is plugged into the end of a power cord so you can try different locations before you plug in your carpet cleaning equipment, dehumidifiers, in line water heater,...

Helps avoid tripping breakers on dual cord machines or when using accessories like an (Rotovac) or separate electric heater.

No light means on same phase or breaker.

Fully lit means different breakers on different phases (this is what you want.)

Great for multi-corded carpet cleaning machine, carpet cleaning heaters, power wands, running large dehumidifiers.

No guarantee on shade or color of materials used for the build, but usually gray, brown, or black
