ProRestore Electro-Gen Electric Thermal Fogger (110 Volt) Unsmoke ElectroGen 102257000  
(Backordered 3-4 weeks per factory)

Manufacturer: Drieaz

(Backordered 3-4 weeks per factory)

ProRestore Electro-Gen&trade;

The industry's most durable electric thermal fogger.

A versatile odor control application tool, the Electro-Gen produces a true "dry fog" with a particle size similar to that found in smoke &ndash; allowing for deep, thorough penetration and virtually eliminating the drips and streaks associated with conventional mister and foggers.

For complete instructions and safety data for this product, refer to the User Guide, available under the Documents tab.

Remove the barrel and the Electro-Gen also can be used as an electric sprayer to apply solvent or water-based chemicals for disinfecting (hot nozzle removed), deodorizing, flame proofing (hot nozzle removed), pest control, fabric protecting (hot nozzle removed), and more.
