The Next Big Thing in Truckmounts

Introducing the Escape® Plus, the first electric truckmount to truly rival gas power!
Featuring Three LX® vacuums, the Escape® Plus's specs are
undeniable: 242+ CFM and 17 in. Hg / " – and at a fraction of the cost of
gas-powered truckmounts!

57,594 vacuum units

44.4 amp Vacuum

You can now enjoy the advantages of electric–such as reduced costs, minimal
maintenance, and low environmental impact–without sacrificing raw power.

The Escape® Plus also comes standard with chemical metering, a 1000 PSI
solution pump and a 3.3 GPM pump-out to make for one seriously incredible
machine!

Features:

Four exclusive Mytee® LX® Vacuum Motors – outputting 242+
CFM and 17 in. Hg

Autofill and automatic pump-out

12 gallon solution and recovery tanks, plus an included transfer pump to expand
capacity to additional holding tanks

The industry's only truckmount to come standard with a transfer pump

3.3 gpm auto dump

1000 PSI adjustable solution pump

Chemical metering

Weighs only 180 lbs!

Note: "Mytee may make changes in products it manufactures and markets at any
time; these changes are made without obligation to change, retrofit, or upgrade any
product previously sold or manufactured."

In 2021 Mytee removed the 30 gpm auto dump flood pump and replaced with
Aquatec 3.3 gpm cleaning discharge pump. Other changes can take place at any
time without notice.

1000 PSI

Pump-Out

3.3 GPM

Optional Transfer Pump

60 PSI, 3.3 GPM, 115V

Amp Draw

30 amp @ 240 volts

Generator Requirements

459cc or larger with premium or ethanol free fuel

Sold machine only for this webpage.

Questions and Answers:

Q. Will this machine operate on a standard electric clothes dryer outlet?

A. No, uses way too much electricity to put on a 50 ft 10-3 cord. You can hook to a Range plug with a 8-3 cord and it will work fine.

Q. What will happen if I used on a standard 389cc or 420cc generator?

A. I expect the generator will operate but something is going to give. This would be like me selling you a car with a top end speed of 120 miles an hour and you try to drive it 140 miles an hour every time you get behind the wheel. Every single generator manufacture recommends that your actual use rating be at least 20% higher than the normal run capacity of the generator. This machine uses 70 amp or 8400 watts of power. That means the run capacity really should be 10,000 watt. This would place the surge or starting capacity at about 12000 watts. That is a 459cc generator or larger using premium fuel or ethanol free fuel. E85 and E87 would not be recommended! Please note the generator would also have to be grounded or bonded to the building. We have discussion in our forums on how to bond the generator to the building.

NOTE: in 2021 Mytee change the design from being a 4 power corded NEMA 5-15 design, the newer machine operates on a single NEMA 14-30P

Usually you will need to purchase the optional a L14-30P to 14-30R operate on a generator.

Mytee Escape ETM-LX-Plus NEMA L14-30P To 14-30R Electrical Power Adapter for Generator Use 20210422

**4/29/21 BE Pressure changed the design of the generators and removed the L14-30 outlet and change to a 14-50R instead. Use adapter 20210429 instead!

Note: "Mytee may make changes in products it manufactures and markets at any time; these changes are made without obligation to change, retrofit, or upgrade any product previously sold or manufactured."

In 2021 Mytee removed the 30 gpm auto dump flood pump and replaced with Aquatec 3.3 gpm cleaning discharge pump. Other changes can take place at any

time without notice.

Can the Mytee Escape LX-Plus really be 350 CFM?

<https://www.steam-bright.net/forum/carpet-cleaning-equipment/truckmounts/21290-can-the-mytee-escape-plus-really-product-350-cfm>
