Chemspec: Stainshield Concentrate Carpet Protector 1 Gallon

## Stainshield®; Carpet Protector

A stain repellent, soil retardant, non-toxic carpet protector. Protects carpet from liquid spills and stains - A fluorocarbon, water based stain and soil retardant. This specially formulated carpet protector protects far beyond just dry soil and water stain repellency. Stainshield®; protects against oil based stains and spills too.

Keeps carpets better looking between cleanings - An application of Stainshield®; to rugs or carpets allows your customer to easily clean up spills before they penetrate into fibers. Does not eliminate professional cleaning &mdash; but gives your work a better, more beautiful appearance between cleanings.

Contains special penetrants - Special penetrants help ensure each fiber is coated for maximum protection. Stainshield®; is less likely to just lay down on the carpet like a protective plastic sheet but, instead gets down into the carpet for complete protection.

Leaves carpet with a soft natural hand - Customers will love the soft, luxurious feel of the carpet after an application of Stainshield®;. Your customers will appreciate your giving them the same luxurious feel that they originally bought in the carpet.

Stainshield®; also imparts some anti-static properties.

Use where ever there's a carpet - Ideal for use on commercial and residential rugs, including stain resistant making Stainshield®; ideal for use in offices, department stores, restaurants &mdash; wherever stain and spot protection is desired.

Easy to use - For freshly cleaned, dry carpet mix 16 oz. with one gallon of water and spray evenly over carpet at the rate of 1 gallon per 100 sq. ft., then pile brush in. For freshly cleaned damp carpet, mix 32 oz. with 1 gallon and spray 1 gallon of diluted solution over 200 sq. ft., then pile brush in.
