EC5000-22060 - Air Duct Cleaning System (220V/60HZ)

Nikro "EC" Air Duct Cleaning Systems offer professional air duct cleaners all the power needed to clean up with confidence.

These powerful vacuums are compact, lightweight, and portable - making them ideal for residential and light commercial work.

The #EC5000-22060 incorporates two - 1.5 horsepower, backward incline motor and blower assemblies, which create a powerful combination of vacuum and air flow.

The Nikro "EC" Systems incorporate an exclusive 3-stage filtration system which includes a final stage H.E.P.A. (High Efficiency Particulate Air) filter rated at 99.97% @ 0.3 micron particles and larger, DOP Tested. This actually meets or exceeds OSHA, EPA, and NADCA Standards for cleaning the air of toxic and nuisance dust.

This unique filtration system is specially designed to prevent premature filter loading, thus providing maximum vacuum at all times, and lowering the cost of filter maintenance.

Each vacuum is equipped with a filter monitoring gauge which takes the guess-work out of filter maintenance.

With the special high efficiency motor design of these units, they can be ran virtually anywhere.

The unique 3-part aluminum body design with carrying handles and built-in dolly with stair climbers allows the unit to be separated and easily maneuvered or carried even in the tightest spaces.

Each Unit Includes:
Vacuum with complete set of filters
#860147 - 12" x 25' PVC Flex Duct
#860111 - 12" Duct Mounting Flange
#860249 - 2 - Quick Connect Hose Clamps
