HydraMaster 000-079-094 APO Automatic Pump Out Retor Fit Kit 4.8 CDS Truckmount 12 Volts

HydraMaster's APO is built for reliability. It is externally mounted to the recovery tank. It dismounts quickly for easy serviceability and is driven by a high-efficiency DC motor. This vertical mounting design protects the APO assembly from damage and preserves valuable van floor space.

The Dura-Flow® APO is engineered to produce a 4.5 GPM flow under full vacuum (14" HG) and requires just 9.5 amps compared to competitive models needing 13 to 25 amps. It uses a 1/4 HP 12-volt DC motor and low RPM pump for longer impeller life. This APO is able to pump larger solids and debris than competing options.

Most reliable pump out in the industry.

Uses Leeson PE350 12 Volt gear Motor

No filters or check valves to clog

Works well for water damage 4.5 gpm at 14" HG

Low amp 1/4 HP 12-volt DC motor

Full one year warranty

000-079-094 APO, HYDRAMASTER retro fit kit is used to convert standard manual drain truckmount to a non stop automation machine.

Includes the liquid level switch that you place inside of the vacuum waste tank and more connection hoses that the basic kit 000-079-097.
