Double Insulated 10 awg Jumper Wire with 1/4 Inch Loop Terminals 24 feet 20180606

Manufacturer: Clean Storm

Double Insulated 10 awg Wire with 1/4 Inch Loop terminal on each end.

Perfect option for joining the positive post of two 12 volt batteries together.

Made from taking a 14-3 X 25 power cord and cutting off both ends, twist all three wires together, add the eyelet loop and heat shrink. Same wire thickness as 10 awg / gauge.

Double insulation allows for zip tying to the frame of your trailer or pressure washer, or truckmount without worry if rubbing through insulation.

Can be used to joint the positive post of truckmount batteries to the starter post of the van.

Commonly used with adding a 12 volt burner system to a truckmount system.

Please specify if you want the unit shorter than 24 ft as be default we are just going to cut the ends of the extension cord, crimp and heat shrink the ends. Finished product is going to land at 24.5 ft.
