80"/200cm Self Climbing high rise window cleaning system.

7' cleaning path,

.5 to .75 gallon per minute

Pure Water Window Cleaning System

Faster, Cleaner, Safer-The Clear Advantage For High-Rise Window Cleaning! The High Rise Sky Pro Mini can safely do a months worth of window cleaning in less than a day.

- 90% labor savings
- Safely operated from top of building
- Cleans windows and frames
- Windows stay cleaner longer with Pure Water
- Easier to find and retain labor
- Fast ROI for building owners
- Cleans entire building for extended life
- No chemicals required by using Pure Water

Self-Contained/Self-Climbing

The High Rise Sky Pro Mini is a completely self-contained/self-climbing window cleaning system that can be operated from existing roof rigs, davit arms, roof cars or portable rigs. Operation is easy via a wireless remote control.

Patented Technology

Patented raindrop nozzles create large droplets of deionized water reducing drifting. The High Rise Sky Pro mini travels with ease vertically up and down building's on a guide wire.

Cleans Windows And Frames

The High Rise Sky Pro Mini is the ultimate cleaning machine providing a clean and spot-free surface. As the unit travels up and down the building the glass and frames are cleaned of corrosive pollution residue, extending the life of the building. By using our Ultra Pure setup the Pure Water leaves the windows crystal clear and residue-free, allowing the windows to stay clean longer. The Sky Pro Mini is designed to run from bottom to top using a double pass method coming back down the building the same path. Doing this accomplishes two things: 1st it helps to loosen more stubborn soils/ dirt on the first pass and then scrubbing and rinsing on the second pass back down the building.

High Productivity

The Return On Investment (ROI) is amazing. The High Rise Sky Pro mini travels at a rate of 35 feet per minute and will clean up to 30,000 sq./ft. per hour. Clean as much in one day that normally would have taken a month to clean. With this type of efficiency, your ROI can be as little as one year.

Portability

The High Rise Sky Pro Mini is portable and can be transported from building-to building with just a standard trailer. The portable rigging can be set up in as little as 20 minutes allowing you to clean multiple buildings.

Why Pure Water?

The mineral free water provides incredible cleaning action and spot free windows without using chemical. It keeps windows cleaner longer leaving no residue or build up on the surface.
