Husqvarna Pullman Ermator S36 Hepa Vacuum 20900057A 240V
14Amp 353Cfm Dust Collector 967753601 [967818001] 967663802

S 36 is a very powerful single-phase HEPA dust extractor to match the grinding machines Husqvarna PG 530 (1-phase), PG 450, PG 400 and PG 280 as well as small to mid size scarifiers, grinders, shot blasters and handheld power tools. This professional dust extractor is designed to meet strict demands. Three large, commercial-grade vacuum motors provide plenty of power. Equipped with three independently tested and certified HEPA H13 filters and a massive cone-shaped pre-filter with over 4.5 m² of media. This results in superior dust collection, even of fine sanding and gypsum dust. Features include Jet Pulse pre-filter cleaning, hour counter and vacuum meter for filter control. The non-marking wheels are puncture free and lock at the front. The Longopac® bag hose system ensures simple, dust-free bag changes 2" vacuum hose connection.

Exact color or shade of the paint is subject to change without notice. Ships in red (967753601) or orange (967663803) or Black.

The original model had the 6-20P, then the L6-30P, now the CS8269 Plug
The idea was to use one giant 50 amp 240 volt power supply through the SC8269 and then you plug your L6-30 grinder into the outlet on the side of the vacuum. Like a daisy chain system.

Same vacuum and design, just different final plugs.

If you do not like that type of system, you can remove the factory plug and install the following UL approved plugs.

Unscrew the factory plug and replace with L6-20P (provided in this bundle)

Then they can use the provided power supply to plug in every where!

No Generator Required!

NEMA L6-20P Plug for 10 and 12 AWG Wire

When you change the CS8269 to the L6-20P you will no longer be able to use the side receptacle L6-30R to run your grinder off of.

Exact color or shade of the paint is subject to change without notice. Ships in red (967753601) or orange (967663803).

No need to operate on a gasoline generator.
It is much easier to find two power cords drawing 14 amps each and than a single 240 volt outlet.
Circuit Hunter Inverter Dual 15 amp 115v to 230v 30 amp twistlock NEMA L6-20 Includes 25ft power cord
Plugs into every home, every business in the USA, Canada, and Mexico!
