SOLD IN 3-PACKS

- * Hard bond, made for medium and soft surfaces
- * Grit options from 20 / 30 / 50 / 100
- * Segment options: Single or Double
- * 10.5mm segment height

Benefits

- * Changing the size of the diamond grit to a smaller particle / grit size will affect the performance of the diamond tool in the following ways:
 - * Working with a single segment will increase the pressure on each segment.
 - * Working with a double segment will decrease the pressure on each segment, reducing the wear rate on the diamond segments. This will lead to a smoother scratch pattern, and will also reduce the load on the machine.
 - * Half Set Diamonds placed at three alternating positions on the diamond holder disc (diamonds at four alternating positions).
 - * Full Set Diamonds placed at each of the six positions on the diamond holder disc (diamonds at all eight positions).
 - * Power and Weight - The power of the machine is a very important factor. A more powerful machine enables the operator to choose harder bond tools.
