Manufacturer: Husqvarna Construction Products

Husqvarna PG690 Propane 967980201 Concrete Grinder

A propane drive version of our versatile PG 690 model. The propane drive makes your operation independent of electrical access and makes the PG 690 Propane the perfect choice for large outdoor concrete slabs. The new electric fuel injection system cuts fuel consumption and reduces the risk of freezing - while the exhaust catalyst makes for even lower emissions. Key components are sealed against dust and slurry for maximized reliability and low maintenance. It is easy to handle, tilt and operate with optional adjustable weights for extra grinding pressure. Combine your grinder with a Husqvarna propane driven dust extractor for maximum productivity.
