The 112PVC pump was developed for compatibility with certain chemicals such as Chlorine Dioxide and bleach. Machined from solid PVC, ceramic, alloy C-276, and PTFE, this pump can be combined with a controller to meter chemicals into water lines up to 100psi. Uses a primary and secondary seal system to ensure leaks are trapped and recirculated back into the pump. Designed to fit our 1/8hp permanent magnet DC motors in a variety of voltages.
