Owners Manual

Product Description

HTC D80 is a large dust extractor especially suitable for heavy coating removal (floor preparation) and large flooring projects in combination with large size grinders (size 8 and above). HTC D80 is equipped with a high-performing integrated pre-separator that removes up to 95% of the dust and increases filter lifetime. The HTC D80 dust extractor can be used in various ways depending on your setup. For maximum efficiency and output we recommend a remote-controlled grinder. If you use a traditional grinder without remote control you can still benefit from the double Longopac®; or make use of the optional remote control to turn on and off the dust extractor from a distance.

Air Flow 412cfm

Rated input power 10hp

Weight 600lbs

Uses 3" ID vacuum hose not included.

Requires plugging into a 480 volt 3 phase commercial electrical panel. Power cords and breakers are not included.
