The EZgrind series is a resin bond diamond tool with velcro back for handheld machines, made of the same resin used in our EZ SR tools. This series is, therefore, a perfect complement to the SR tools and a given choice in our HTC Superfloor process. The series contains tools in different grit sizes ranging from surface leveling and rough grinding down to the initial steps of polishing. For a high gloss and perfect finish, and especially if you are following our HTC Superfloor concept, we recommend you to then switch to our FENIX tools for the remaining yellow and green polishing step.

Available in the following grits:

- Grey – 40 grit
- Brown – 60 grit
- Black – 100 grit
- Blue – 200 grit
- Red – 400 grit
- White – 800 grit
