

Model Number: NM171SD

Powr-Flite NM171SD New Millenium 17 inch Floor Machine with Sandpaper Driver Freight Included

Manufacturer: Powr-Flite

Millennium Floor Machine With Sandpaper Driver 17" 1.5 HP

This Powr-Flite 17" 1.5 hp Millennium Edition Floor Machine comes with a sandpaper driver to get you started on your next sanding job immediately.

The 17" 1.5 hp Millennium Edition Floor Machine's dual capacitor motor starts easily, even with the most aggressive sandpaper, but it can also be used for more delicate jobs such as buffing finished floors. Millennium Edition floor machines are heavier than floor machines of a similar size, giving you maximum pad pressure for the best results. The molded housing will absorb the impact often seen in transport. 175 RPM is considered the most versatile floor machine speed and when using a standard pad driver, a wide variety of applications are at your disposal - including shampooing, scrubbing, sanding, scraping, grinding, stripping and buffing.

Features

- Included sandpaper driver - SB17M
- Patented rotationally molded one-piece housing reduces noise and vibration
- Powerful 1.5 hp, 175 RPM dual capacitor motor starts easily, even with the most aggressive sandpaper
- All Steel Triple Planetary Gear Box
- Uses 17" Pads / 15" Brushes
- Thumb activated safety interlock switch prevents accidental start-ups
- Each machine is assembled and tested by skilled American workers
